After close to a decade working as a public relations professional, I discovered a real joy and passion for computers and coding. Following this passion led me to reenrol at university and begin working for a Perth-based application development consultancy where my communications expertise, ability to learn quickly and desire to deliver clean and effective solutions to clients has made me an invaluable part of the team.

I am looking to expand upon this experience and continue my career progression as a full stack developer.

Experience

2018 - **INCUB8**

Current

- Web-based application development following the model-view-controller architectural pattern.
- Integration of frontend technologies to produce desired functionality and behaviours.
- Preparation of new - and modification of existing - database schema.
- Using version control systems to prepare, develop and deploy new features and application fixes.
- Following code paths to pinpoint and resolve the source of errors and unexpected behaviours within various applications.
- Resolving user-reported issues utilising various tools.
- Liaising with customers to understand client needs including implementation timelines, business requirements, and associated tasks which may need to be taken into consideration.
- Providing feedback to clients regarding viable solutions to requested changes including estimated delivery time, required resources and alternate implementation options.

2007 -
2017

Public Relations Professional

- Coordinate production and dissemination of internal and external communications material through; liaising with key stakeholders to assess and action their needs; proof reading and editing content; and coordinating external delivery through the website.
- Social media management.
- Coordinate key communication projects and provide high quality correspondence, reports and briefs for senior management regarding project progress, achievement of milestones, potential media opportunities and related issues.
- Ensure compliance with relevant legislation, regulatory requirements, corporate policy, ethical standards and team processes and procedures.
- Crisis management and mitigating negative media coverage.

Education

2018 - **University of Western Australia**

Current Postgraduate Diploma of Science (Computer Science Major)

2014 **Curtin University of Technology**

Bachelor of Commerce (Public Relations and Journalism Double Major)
